and blocksded with freight, is undenlably headequate to the wants of the public and the necessi-ties of trade and travel. The plank-road from Philole to Timsylle is already "a foregone concination," and must still more necessitate the con-Festern referoad, and so with the Enstern markets. Our chizens, threefore, cannot fall to realize the advantage which must accure to their brainess interests, and to the prosperity of Titusville, by means of a Railroad which will enable freight to be chipped from this place to Jersey City without breaking but.

Abbott with the enterprise will commend it to popular favor and patronage. Further informa-tion may be obtained from these gentlemen.

(For the Morning Herald.)

The memory's hourThe hour when daylight dies, and worlds
Before unknown, look down from heaven
Like gaardian angels; though meen
By day, are ever hovering near.
Back lirough the weary write of years
This witching hour lims borne my heart.
Living gain a child I seein;
Rosad me apath the loved ones shand,
And volces areet mes to long unheard;
And yet funiliar m, the light
Of morting, and as locatiful.
All lovingly they fold me
Closo in to heating hearts sgain;
And life seems new, and hope is strong.
The long, tone years/ore sweet may
Elke troubled dictains at break of day;
But as Hook the vision fades
Beyond any sight. The barning cears
Gaish from my heart, and weatily
I pray for rest and loved more,
Though in the coid, damp grave.

Tubing Oil Wells.

Editors Morning Herald:

then somes a rush of oil to the bottom of the working barrel. This creates an unusual quantity of gas, which has a tendancy to hold up the shout twenty-three rullee, with a valley route and a low summit. Good engineers are of opinion that the road can be fulfill and placed in run-louing order in the brief space of ninety days. The coil, it is not acceed \$400,000, and it is my impression that this would be avoided, by placing the seed bug of from 100 to 150 feet from the surface of the well; if placed in such a manifold exclude a great majority of the on 31 to 48th, with not exceed \$400,000, and it is the surface of the well; if piaced in such a manual section that \$180,000 be raised in Tinaville and \$1000 the proposed line to Union.

The Oil Creek road, crowded with passengers the well, leaving some small seins to mix with the oil, which could constantly feed the pumps, and bave a tendency to create a constant flow of oil and water. In such a case; the engins would work more steadily, and with far greater ease, and there would be far less sprain on the walking beam and sucker-rosts,

The length of rubing in a well should be governed by the locality of the largest oil veins, for it is necessary to form the greatest strength of vacuum at such a point in a well so as to such the oil and parathe out of the seams or crevices in the sand-rock.

It is, undoubtedly, a common error of tubing
